

AETNA — YOUR HARDWARE RESOURCE

Dedication • Resource • Inventory • Value-added • Experience

With thousands of hardware items in stock, Aetna Plywood truly is your one-stop source. We have brought in lines from top manufacturers around the world to meet your daily hardware needs, while maintaining the highest quality standard.

Our hardware selection continues to grow to better serve you.

Our program can take you from start to finish. We have the tooling to cut or shape your material through the abrasives and the edge banding to finish it. At the assembly stage we have the proper screws, connectors or 8mm dowels to match your methods, as well as a wide selection of slides and hinges. We don't stop there, though. We carry a complete selection of interior accessories for the kitchen and entertainment units including lazy susans, chrome kitchen units, audio/video storage, and TV turntables. And the list goes on...

You get what you order. Aetna Hardware does not substitute product or regularly change manufacturers. This is done to assure you consistency and peace of mind.

Finally, we are a resource. We can make recommendations on hardware to assist your processes, and we can often source the hard-to-find items. At Aetna, we are your complete source for selection, knowledge and inventory, as well as a valuable resource.
