# UV Wood

## Prefinished to give you a big head start.

UV Wood is prefinished with acrylate epoxy and cured with ultra violet light. This saves you valuable time and money, and eliminates exposure to harmful VOC emissions. And because it's prefinished, UV wood is perfect for any application in which a clear, durable finish is required, such as:

- **Cabinets • End panels • Vanities**
- **Shelving • Casegoods • Drawer parts**

*Aetna now offers UV Wood in virtually any combination of specie, grade and core.  
We currently stock UV Wood in medium gloss, 48 1/2" x 96 1/2" (1/2" oversize)*

# Superlight MDF: 34% lighter than standard MDF

Superlight MDF is the lightweight MDF with the heavyweight advantages. It offers homogeneous edges, smooth surface and high dimensional stability. Plus, all the ease of finishing and machinability you expect from MDF.

- Produced from self-sustainable Radiata Pine by-products, using state-of-the-art technology that makes intelligent, effective and environmentally-sound use of forest and mill by-products.

**Applications:**

Furniture and furniture components, casing and decorative finishes. Mobile homes or boat interiors, displays, and exhibition booths.

**Fastening:**

Straight shank (parallel thread) screws; ring-shank nails fixed slightly slanted to the surface; grooved dowels, staples and glues are recommended. Fasteners should be at least 1" from corners.

**All with a Balancing “Brown Paper Backer”**

## Unique Product: Ultra-Core MDO.

Plum Creek plywood is constructed from prime inland Group 1 western softwood veneers known for their tight grain and small knots. Furthermore, Plum Creek’s Ultra-Core technology creates continuous, composed crossband veneers for virtually “gap-and-lap-free” cores.

Plum Creek’s Ultra-Core MDO is the result of pre-composed crossband cores and an automated lay up process that together minimize core gaps and provide consistently high levels of core integrity. Merchantability, weatherability, durability and thickness tolerance are all enhanced compared to conventional MDO cores.

### Plum Creek Ultra-Core MDO gives you what you’re looking for:

- Inland western softwood species, featuring tighter grain for higher strength and weatherability.
- Ultra-Core construction means fewer and smaller gaps for increased strength, durability and minimal core telegraphing.
- 2 step overlay process means smoother, more consistent faces.
- Dedicated MDO press allows controlled production runs for greater quality and consistency.

### Paint/Lamination/Cut-up Applications

- Ultra-Core construction reduces core voids and gaps to minimize waste in cut parts and increase weatherability and durability.
- 2-step face construction and dedicated press assure consistently high levels of face smoothness for paint and lamination.

### “What’s the difference?”

Panels will increase in face quality as you go up from an HPVA “A” to a “AAA.” Veneers used in the premium grades tend to come from the top end of the “A’s” The backs do the same. “B” or “A” is actually a face grade that we put on the back.

**Some of the specific characteristics can be found in the HPVA “American National Standard Grade Book.” Here are some highlights (note: certain characteristics vary between species):**

FACES	MIN WIDTH IN COMPONENTS	COLOR VARIATION	FIGURE	SEQUENCED MATCHED
HPVA “A”	5"	SLIGHT	YES	NO
PREMIUM “A”	5"	SLIGHT	YES	YES
AA	6"	MINIMAL	MINIMAL	YES
AAA	7"	ALMOST NONE	ALMOST NONE	YES

BACKS	MIN. WIDTH IN COMPONENTS	BOOKMATCHED	CUT
