## MICORE DOES IT ALL!

Micore 300 Board is a superior substrate that offers outstanding resilience, excellent machinability, high “k” factor, heavy density and best surface hardness of any Micore board. Its smooth surface, particularly when sanded and coated, laminates easily with various finish materials such as vinyl, fabrics, and steel. It readily accepts water- or solvent-based adhesives.

### Micore 300 is:

- More than 50% lighter than Gypsum panels and almost 50% lighter than particle board
- Better than Gypsum panels in workability and sound absorption
- Better than particle board and other wood fiber boards for flame spread index\* and sound absorption

\*Micore 300 meets Class A Burning Characteristics per ASTM EB4 (Flame Spread index of 25 and Smoke Developed Index of 20).

### Micore 300 improves the quality and performance of applications such as:

- Fabric and vinyl-covered wall panels
- Office dividers
- Chalk boards and many other applications
- Tackboards

### Aetna now stocks Micore 300 in the following sizes:

3/8" 48 x 96	1/2" 48 x 96	1/2" 48 x 120
7/16" 48 x 120	3/4" 48 x 96	3/4" 48 x 120

### “What’s the difference?”

Panels will increase in face quality as you go up from an HPVA “A” to a “AAA.” Veneers used in the premium grades tend to come from the top end of the “A’s.” The backs do the same. “B” or “A” is actually a face grade that we put on the back.

Some of the specific characteristics can be found in the *HPVA American National Standards Grade Book*. Here are some highlights (note: certain characteristics vary between species):

FACES	MIN. WIDTH IN COMPONENTS	COLOR VARIATION	FIGURE	SEQUENCED MATCHED
HPVA “A”	5"	SLIGHT	YES	NO
PREMIUM “A”	5"	SLIGHT	YES	YES
AA	6"	MINIMAL	MINIMAL	YES
AAA	7"	ALMOST NONE	ALMOST NONE	YES
BACKS	MIN. WIDTH IN COMPONENTS	BOOK MATCHED	CUT	
#1	ANY	NO	R/C or P/S	
B	3"	YES	P/S	
A	5"	YES	P/S

# MDF PANELS

Arauco is the largest forestry enterprise in South America and one of the largest in the world in terms of plantation size, kraft pulp, sawn timber and panel production.

Arauco's timberlands total of more than 1,100,000 há. and consist of plantations, native forestlands and protected areas. In Chile, the company's holding include approximately 600,000 há. of managed Radiata Pine plantations.

The company produces medium density fiberboard (MDF) through its Trupan division. With the recent construction of two new MDF plants, Trupan's planned annual capacity will increase from 150,000 m<sup>3</sup> per year to 650,000 m<sup>3</sup>.

These two new continuous press plants will allow Trupan to produce various densities of MDF (e.g. standard, light and ultralight) in a wide variety of thicknesses ranging from 1/8" to 2" and sizes.

Trupan MDF boards is produced from fresh, debarked Pine logs harvested from Arauco's own company managed plantations. Due to the excellent quality of our 100% softwood raw material, Trupan MDF is exceptionally easy to machine and has excellent edge profiling characteristics. Its smooth, uniform surface offers exceptional performance for both painting and laminating applications. It is ideal material for use in furniture, RV, and fixture industries.

**TRUPAN STANDARD:** Fiber Board with an average of 45lbs/ft<sup>3</sup> (720 kgs/m<sup>3</sup>) of density, ideal for uses that require demanding physical-mechanical properties. Applications: Furniture, laminating, fixture, mouldings, doors and others.

**TRUPAN LIGHT:** Fiber Board with an average of 38lbs/ft<sup>3</sup> (600 kgs/m<sup>3</sup>) of density, ideal for uses that require demanding physical-mechanical properties and less weight than standard MDF. Applications: Furniture, interior design, doors, fixture, RV, laminating, mouldings and others.

**TRUPAN ULTRALIGHT:** Fiber Board with an average of 32lbs/ft<sup>3</sup> (500 kgs/m<sup>3</sup>) of density, ideal for uses where an extremely light weight material is requested. Applications: Furniture, mouldings, RV, suspended ceiling, indoor paneling, picture frames and others.

**TRUPAN THIN MDF:** Fiber Board with an average of 50lbs/ft<sup>3</sup> (800 kgs/m<sup>3</sup>) of density.

# Ultralight MDF

Ultralight MDF is the lightweight MDF with the heavyweight advantages. It offers homogeneous edges, smooth surface and high dimensional stability. Plus, all the ease of finishing and machinability you expect from MDF.

- Produced from self-sustainable Radiata Pine by-products, using state-of-the-art technology that makes intelligent, effective and environmentally-sound use of forest and mill by-products.

**Applications:**

Furniture and furniture components, casing and decorative finishes. Mobile homes or boat interiors, displays, and exhibition booths.

**Fastening:**

Straight shank (parallel thread) screws; ring-shank nails fixed slightly slanted to the surface; grooved dowels, staples and glues are recommended. Fasteners should be at least 1" from corners.

## **Aetna Plywood, your complete source for Duraflake Fire-rated Duraflake Particleboard: MADE IN THE USA!!**

**Basic Use:** Duraflake FR is a class 1 rated fire retardant particleboard, suitable for a variety of industrial and commercial building applications where stringent building codes and public safety requirements are a factor. It can be drilled, routed, bullnosed, beveled and precision-machined. It is used as a substrate for wood veneers, high and low pressure laminates, as well as thin roll laminates. Laminated panels are then used in a wide variety of applications such as malls, offices, commercial case goods, hospitals, hotels, restaurants and any application where fire retardancy is a concern.

**Composition and Materials:** Duraflake FR is made from western softwood particles and highly effective fire retardant chemicals bonded with special formulas of resins and waxes.

## **FIRE RATED MDF**

FR MDF was developed specifically to meet the requirements of Class 1 fire retardation in accordance with UL Flame rating, while delivering performance and environmental features previously unavailable in an FR material.

Applications: FR MDF allows users to meet stricter building codes, reducing liability exposure and providing safer work places and living environments. It is the material choice for:

- Fire rated doors
- Raised floors
- Wall systems
- Elevator cabs
- Furniture and cabinetry
- Shelving and counter tops
- Mouldings
- Architectural millwork
