Look To Aetna For Quality Laminating... with professional results.

Aetna specializes in laminated panels for your custom needs. You choose the face, back, and core. We put them together using environmentally friendly, water-based PVA glue.

Aetna stocks the product mix to suit your needs.

Core

- Particleboard
- MDF (medium density fiberboard)
- WOODSTALK™
- Plywood
- Skyblend

Faces/Backs

- Wilsonart HPL and Decorative metals
- Import laminates
- Cabinet liner
- Polybak backer
- Paper backed real wood veneers

Sizes

Widths: 24," 30," 36," 48," 60"

Lengths: 48," 60," 96," 108," 120," 144"

Thicknesses*: 1/8," 3/16," 1/4," 3/8," 5/8," 11/16," 3/4," 1," 1-1/4," 1-1/2"

* Custom thicknesses can be manufactured to your specifications

BALTIC BIRCH

100% Birch Panel

Baltic Birch is an All-Birch plywood panel from Russia. The color of panels is carefully selected to provide a deep white, uniform pattern in order to meet the requirements of elite furniture manufacturers. The panel is made with many plies (ex. 18mm has 13 plies.) This provides a unique combination of strength, flexibility, and a perfect edge.

Furniture, cabinets, interior fittings, decoration, flooring, roofing, truck floors, concrete shuttering, specialty products and many other applications require the product with these characteristics.

Perfect for drawer sides

Baltic Birch Veneer Grade Summary

Grade B This is a selected one-piece face, which is generally light and even in color. Some very small, closed pin knots may be allowed, as well as some brown streaks. No patches, voids, or mineral streaks are allowed. The surface is well sanded.

Grade BB This is a one-piece face, which is generally light and even in color. Occasional pin knots and mineral streaking is allowed. All open knots and defects other than those allowed in grade B have been cut out and replaced with oval patches. The patch veneer is the same grade and specie, and is typically of the same color. The surface is sanded.

Grade CP This is a face that has been graded out from BB for small defects and mineral streaking. CP typically has more patches than grade BB that may not always be matched for color. Some splits of less than 0.5mm are allowed. The surface is sanded.

Pricing good through September 29, 2006 as supplies last.

MICORE DOES IT ALL!

Micore 300 Board is a superior substrate that offers outstanding resilience, excellent machinability, high “k” factor, heavy density and best surface hardness of any Micore board. Its smooth surface, particularly when sanded and coated, laminates easily with various finish materials such as vinyl, fabrics, and steel. It readily accepts water- or solvent-based adhesives.

Micore 300 is:

- More than 50% lighter than Gypsum panels and almost 50% lighter than particle board
- Better than Gypsum panels in workability and sound absorption
- Better than particle board and other wood fiber boards for flame spread index* and sound absorption

*Micore 300 meets Class A Burning Characteristics per ASTM EB4 (Flame Spread index of 25 and Smoke Developed Index of 20).

Micore 300 improves the quality and performance of applications such as:

- Fabric and vinyl-covered wall panels
- Office dividers
- Chalk boards and many other applications
- Tackboards

Aetna now stocks Micore 300 in the following sizes:

3/8" 48 x 96	1/2" 48 x 96	1/2" 48 x 120
7/16" 48 x 120	3/4" 48 x 96	3/4" 48 x 120
