VESTA NO ADDED UREA-FORMALDEHYDE RESIN PARTICLEBOARD

VESTA is a specialty particleboard manufactured using a no added urea-formaldehyde resin system. This makes it the optimal choice for additional LEED points, and other no added urea-formaldehyde resin specified projects.

Along with our other panel products, **VESTA** is made with 100% recycled and/or recovered wood fiber, and is an EPP environmentally certified product.

VESTA is available in a wide range of thicknesses and dimensions, and can be raw, **TFM** or **WRM** finished with your choice of design from the Flakeboard collection.

Aetna Plywood stocks an extensive inventory of FLAKEBOARD VESTA - NAUF PARTICLEBOARD

ENVIRONMENTAL BENEFITS

Kirei Board reduces forest clear-cutting, air pollution and landfill use. The sorghum stalks used in the manufacture of Kirei Board are a rapidly renewable resource left after the edible portion of the plant is harvested.

REDUCED WASTE

Until now, these stalks have been discarded or burned, adding to landfill waste and pollution. Kirei Board helps reduce this waste and ease deforestation by substituting for wood.

ZERO FORMALDEHYDE

In addition, Kirei Board is made using a non-toxic adhesive that does not contain formalin, helping reduce toxic formaldehyde VOC's released into the ambient indoor air.

GREEN BUILDING

Kirei Board can be an excellent way to help your projects qualify for LEED credit for environmentally friendly construction.

AETNA + 60" S™ = \$SAVINGS

SAVINGS

Introducing the 60"s™ a line of 60-inch-wide hardwood plywood from Aetna Plywood. These five-foot-wide panels can dramatically improve yield and reduce labor costs...which just happens to help improve profits. In fact, they're the ideal option for manufacturers looking to lower raw material and labor costs, as well as reduce waste. Of course, having greater yield doesn't

mean much without quality. And the veneer used in the face are of superior quality. They're available with either particleboard or MDF cores and manufactured using state-of-the-art technology. Plus, they're available with most major rotary and plain sliced veneers, as well as paper backing, for options that make them perfect for almost any project.

60's PRODUCE BETTER YIELDS

This illustration is an example of increased yields for a 19-1/4" x 31-5/8" component utilizing a 5' x 8' panel. If 1,700 pieces were required, 284 four-foot panels would be used vs. 189 five-foot panels.

That's 95 fewer panels to handle with a 16% improvement in yield.

New 95% yield 5' x 8' Panel

Standard 79% yield 4' x 8' Panel

Features & Benefits

- * Better yield per panel for reduced waste and improved profits
- * Multiple core and veneer choices to fit a variety of applications
- * Large production volume for availability and quick delivery
- * Small unit quantities available so you only purchase what's needed
- * Available in a variety of hardwood face and back combinations, including paper backing
